

The Kenya Safari Code

While on safari...

Keep to designated roads or tracks

Encourage your driver to stay on roads or designated tracks when visiting national parks or reserves. Off-road driving can cause extensive damage to grass and woodland habitats.

Minimise disturbance to animals

Wild animals become distressed when they are surrounded by several vehicles, or vehicles come too close to them. Keep noise to a minimum and never try to attract an animal's attention.

Stay inside your vehicle at all times

Do not stand on the roof or hang out of the windows, and only leave your vehicle in designated areas. Remember: Wild animals can be dangerous!

Keep to the speed limit

Most wildlife areas have a speed limit of 40kph – and animals always have the right of way.

Support eco-friendly accommodation facilities

Try to stay in lodges and camps that look after their surrounding environment and support local conservation initiatives.

Never feed wild animals

Feeding wild animals can upset their diet and lead to an unnatural dependence upon people

Take care not to disturb the ecological balance

Please, do not purchase, collect or remove any animal products, rocks, plants, seeds or birds' nests from the wild, or alter the natural environment in any way.

Take all your litter with you

Litter and garbage is very dangerous to wild animals. Keep all litter with you, and be extremely careful with cigarettes and matches, which can cause major bush fires.
